

T2 Tech Group can assess, design and implement integrated backup solutions for enterprise environments.

Expertise: Business Continuity and Resiliency

The growth and complexities of IT

Data is an essential resource that can drive companies forward and help keep a record of the past. As businesses grow, more data is accumulated from different sources, and managing data to speed up operations and prepare for events such as unexpected disaster or business migration becomes an essential component of maintaining up to date information systems. As stores of data continually develop and there is an increase of critical data on storage systems, the importance of backups to business continuity and resiliency cannot be understated.

Consulting expertise for custom fit solutions

At T2 Tech Group™, we know data backups must be reliable, quickly accessible and rapidly recoverable in the event of a critical system failure. Our comprehensive expertise allows us to work with a wide variety of industries to assess, design and implement integrated enterprise backup environments.

In addition to a complete understanding of the IT environment, we are also experts at working with human resources and can collaborate effectively with IT executives and key staff members to map organizational needs and strategies to final hardware and processes. By working with you, our consulting facilitates custom-fit solutions for each environment.

Key benefits

- Manage data to increase operation speed and prepare for emergencies
- Meet regulatory requirements
- Improve the scalability of your IT environment
- Get final hardware and processes matched to your organization by experts
- Save on vendor negotiations

Expertise: Business Continuity and Resiliency

Improve your workflow with modern backup systems

Our solutions focus on business continuity and disaster recovery. During each step of the process, we will work with your organization's objectives and requirements to determine the most practical solutions. Results that clients have achieved by working with us to update their backup systems include the following:

- Improved backup and restore processes
- Reduced overall backup storage space requirements
- Improved scalability as environments grow
- Satisfied data privacy and retention conditions and legal requirements
- Mitigated security risks and damages

Our proven experience

T2 Tech Group has worked with a number of industry-leading organizations to help our partners improve business continuity and resiliency. Past assignments we have embarked upon include the following: an initiative to improve Kootenai Health's storage systems, aiding Children's Hospital Los Angeles with their IT needs during a new hospital project, and improving Comanche County Memorial Hospital's storage and back up environment. Outside of Healthcare, the T2 Tech team has worked with prominent companies, such as Mesa Water District, Starwood Hotels and Resorts, and Infinity Radio.

T2 Tech consistently achieves success with its clients, and our partners have accomplished positive change by engaging in productive vendor negotiations, establishing streamlined IT systems and utilizing improved operations management techniques.

When collaborating with our partners, we never lose sight of the end-user, and our mission is to make sure that your critical systems can consistently meet organizational requirements and provide simple and effective user interface.

About T2 Tech Group

T2 Tech Group is a premier provider of vendor agnostic technology consulting. With the ability to see projects from assessment to post implementation, we strengthen client organizations by leveraging an experienced team, balancing business and IT, providing unbiased solutions, practicing transparency and using a proven methodology.
