

IT Shouldn't Come with a Side of Risk

With mergers and acquisitions, restructures, and recapitalizations, there's a lot at stake. Our proven IT assessments and advisory services uncover the often-unknown variables, hidden deep within the organization, allowing you to feel confident in how to move forward. With T2 Tech Group's strategic approach, you'll never be left wondering how IT will work for the business. You'll know.

A DATA-FIRST, DUE-DILIGENCE APPROACH TO MITIGATE RISK THAT DELIVERS INSTANT ROI.

"The team at T2 Tech Group has consistently been able to help us understand all of the associated risks involved with some of our biggest transactions. They're able to uncover every aspect of technology to help evaluate if the business can continue to be viable under current conditions."

JAMES PIERI | PARTNER & PORTFOLIO MANAGER, HEAD OF HEALTHCARE INVESTMENTS | BLUEMOUNTAIN CAPITAL

The Business of Technology

As strategic as they are qualitative, our IT due diligence and assessments address the technology's ability to transform the business and deliver a plan that helps drive revenue, reduce cost, and mitigate risk. Utilizing our proven methodology, our assessments look at the alignment of:

- **Risk & Budget:** Understand the risks associated with any acquisition, restructure or merger, timeline to transitions services, budget and priorities, resources needed, impact to the business, benefits and economies of scale.
- **Business & Technology Strategy:** A review of current and available technology and the immediate impact on business processes, procedures, plans and finances. This includes short- and long-term strategic plans to support the current and new business strategy, capital/operational budgets, and IT governance structure.
- **IT Organization & Infrastructure:** Aligned to the business strategy, offering key insights into technical components, including infrastructure and application profiles. A view into management and the IT ecosystem, including the IT organizational staffing, department functions, acquisition/implementation processes, business and support services to deliver growth and sustainable profitability.

T2 Tech will deliver key risk levels that are assigned based on achieving the short- and long-term business objectives.

T2 Tech Group's Methodology

As an independent, third-party, T2 Tech delivers an objective risk analysis of the areas identified to provide investment and leadership

teams with the information they need to support the long-term success of the business. In addition to identifying risks, T2 Tech provides a detailed remediation plan with a timeline and budget for upgrades and improvements to support the business's growth and sustainability strategy. An assessment typically includes the following:

- **High Risk Concerns** - An assessment of the high-risk items, including: the services model and IT operations, current obligations and performance record, business operational needs with respect to contracted services, and revenue cycle readiness.
- **Asset and Architecture Assessment** - Identify all key IT assets, evaluate their current state, and perform an evaluation of the architecture the IT hardware environment. T2 Tech will also review the current IT capital and operating plan in order to identify any shortcomings or deficiencies that would impact the business over the next five years.
- **Management Reporting Assessment** - Determine if the Decision Support Systems' (DSS) are able to produce the dashboards and reports necessary for management to effectively manage and operate the business.
- **Application Mapping** - Identify all critical applications being utilized by the business, the interfaces associated with each application, and the departments using each application. This assessment will also identify any overlap in application functionality, in order to repurpose or recommission duplicative applications.
- **People, Process, and Technology** - Evaluate talent, business processes and technology, and provide a gap analysis of each regarding the sustainability of both the current business and the growth strategy.

Benefactors

BlueMountain Capital – T2 Tech Group was hired to perform and complete pre-acquisition due diligence of the IT organization for six (6) hospitals. Upon completion of the project assessments, T2 Tech deemed whether or not the investment of the technology, people and processes were able to sustain the current operations and future growth of the business. T2 Tech has been involved in multiple engagements that have identified and helped BlueMountain Capital avoid risks and develop mitigation strategies and complex restructuring/transition solutions.

Pipeline Health – Davidson Kempner Capital Management introduced T2 Tech Group to Pipeline to provide assistance to reduce any risk in completing the IT transition of Tenet Hospitals by Pipeline, including the facilitation and help of keeping the Cerner EHR implementation on track. Furthermore, T2 Tech negotiated Pipelines contract amendments with Cerner and Tenet to align with Pipeline's timeline.

“Mergers, acquisitions, restructures and recapitalizations are some of the key growth strategies for organizations across every industry. To create true shareholder value, organizations must prepare themselves for the myriad of risks involved. From financial to people management, integration and future-proofing, T2 Tech Group offers an experienced IT and business alignment strategy team that delivers results.”
